

Civil Legal Aid Helps Those Affected by the Opioid Crisis

Among the nearly 72,000 drug overdose deaths in 2017, the sharpest increase occurred among deaths related to opioids.¹ Every day, 1,000 people are treated in emergency rooms for opioid overdoses. The total economic burden is estimated to be \$504 billion.² Of this, \$28.9 billion is due to health care costs. Including those in recovery and their extended family members, more than 11 million Americans are affected by the opioid crisis, with 2.1 million addicted.³ They need our help.

Policymakers know the current epidemic requires a multi-disciplinary response that includes law enforcement, doctors, nurses, mental health professionals, social workers, and case managers.

But civil legal aid providers are also essential partners in solving one of America's most pressing public health issues.

THE NEED IS GREAT...

- Substance Use Disorder (SUD) is a chronic lifelong disorder that may affect an individual's ability to meet responsibilities at home, work, and school⁴ and result in social, economic, and/or legal consequences.⁵
- SUD commonly co-occurs with intimate partner violence,⁶ homelessness,⁷ and mental illness.⁸
- When parents have periods of intense drug use, children may not be properly fed, clothed, or cared for.⁹
- Children of addicted parents experience dramatically increased medical, behavioral, and psychological issues.¹⁰
- In states with the highest number of opioid-related overdose deaths, the child welfare systems are seeing increases in children being removed from their parents' care.¹¹

LEGAL AID HELPS...

- In Washington counties where a pilot parent representation program was established, the reunification rate between children and parents was 11 percent higher, adoption rates were 83 percent higher, and the rate of entrance to guardianships was 102 percent higher compared to counties where the program was not established.¹²
- Representation leads to cost savings for foster parents, subsidies for children's medical care, cash benefits, and the expense of monitoring the foster family.¹³
- Patients receiving legal services reported reduced stress levels and improved health.¹⁴
- When civil legal needs were addressed, inpatient and emergency department use dropped 50 percent and health care costs decreased 45 percent.¹⁵
- Legal aid can assist extended family members in obtaining legal guardianship to address the child's education, medical, dental, and mental health needs¹⁶

Norma gets help to enroll grandchildren in school

"Norma" received a call from her daughter's neighbor in a distant city. The daughter – suffering from opioid addiction – had left Norma's grandchildren with the neighbor and disappeared. After a week, the neighbor could not care for the children and called Norma. Norma went to the Legal Aid Society of Greater Cincinnati the next day. The attorney volunteer drafted a "Grandparent Caregiver Affidavit" that Norma filed with the court the same day. This gave Norma immediate authority to enroll the children in school, take them to the doctor, and apply for benefits to ensure she could afford to properly feed her grandchildren.¹⁷

Medical-legal partnership helps family stay housed

"Melissa" lives in a home with her adult son "Brian." While Brian is currently in recovery for an opioid-related SUD, this wasn't always the case. When still using opioids, he drained his mother's bank account to buy drugs, leaving her unable to pay her mortgage. Through a medical-legal partnership, Melissa's health care provider referred her to their Indiana Legal Services partner attorney who helped her negotiate a loan modification. Under the new terms, Melissa could make the payments and stay in her home, along with Brian, who remains in active recovery with a stable place to live.¹⁸

HOW LEGAL AID HELPS ADDRESS THE OPIOID CRISIS

The Substance Abuse and Mental Health Services Administration (SAMHSA) identifies health, home, purpose, and community as four essential components to recovery from drug addiction.¹⁹ Legal aid providers can help individuals with opioid-related SUDs secure housing and health care services, ensure their children are cared for, escape domestic violence, and remove obstacles to employment, increasing prospects for recovery. They can also help extended family members become legal guardians to children whose parents are struggling with a SUD. Legal aid programs have partnered with local courts, bar associations, schools, and their medical counterparts to provide legal help, often leveraging staff attorneys and paralegals with pro bono volunteers.

EXAMPLES OF PARTNERSHIPS WITH LEGAL AID

Medical-legal partnerships help individuals with SUDs

Indiana Legal Services and Eskenazi Health teamed up to help people with SUDs expunge criminal records, secure housing assistance, and navigate custody issues.²⁰ In Ohio, Good Samaritan Hospital Faculty Medical Center's program to help opiate-addicted pregnant women addresses legal needs related to homelessness, human trafficking, domestic violence, and access to benefits through their partnership with Legal Aid Society of Cincinnati. Training ensures that attorneys and paralegals better understand SUDs, and nurses and social workers learn how to spot problems with possible legal solutions and make referrals.²¹

Partnerships with courts and bar associations

Local news profiled [Texas Legal Services Center](#)²² and [Legal Aid Society of Greater Cincinnati](#)²³ when they launched pro bono partnerships with courts and bar associations to provide grandparents and other extended family members with free legal

help to care for the children when the opioid epidemic robs them of their parents.

Legal aid programs awarded US Department of Justice grants to partner with nonprofits and schools

In September 2018, the US Department of Justice Office for Victims of Crime awarded *Enhancing Community Responses to the Opioid Crisis: Serving our Youngest Crime Victims* grants to ensure critical legal help: Ohio State Legal Services Association convenes community partners to launch the Appalachian Ohio Children's Victim Assistance and Prevention Project; Legal Aid Services of Oklahoma partners with the Center on Child Abuse and Neglect, and Kids' Space, for wraparound multidisciplinary services; and Legal Aid of West Virginia and Legal Aid of the Bluegrass provide trauma informed legal and other services to children and their caregivers in partnership with public elementary schools.

FUNDING OPPORTUNITIES

Several federal grants can fund social services – including legal services – to individuals and families dealing with SUDs. Examples of federal grants administered directly by federal agencies that have allowed funds for legal help include the *Enhancing Community Responses to the Opioid Crisis*²⁴ and the *Rural Community Opioid Response Program*.²⁵ Examples of federal block grants administered by states include Substance Abuse²⁶ and Mental Health Block Grants,²⁷ State Opioid Response Grants,²⁸ and VOCA Victim Assistance Formula Grants (for SUD-related child and elder abuse).²⁹ Additional information on grant sources for legal services can be found in the Justice in Government Project's Toolkit.³⁰
